Companion Planting Chart

Which vegetables and herbs grow well side by side, and which to keep apart

● Good neighbours ✕ Keep apart Blank = no strong pairing recorded. Find a crop in the left column and read across.

Crops are grouped by plant family (thick lines). The A-Z table on pages 3-5 covers all 92 crops and herbs on myplantingcalendar.com.

Quick answers

Computed from the same data as the chart

Good pairs in this chart (a few well-known ones)

- Tomato + Basil
- Tomato + Carrot
- Carrot + Onion
- Lettuce + Radish
- Cucumber + Dill
- Sweet Corn + Pole Bean
- Sweet Corn + Winter Squash
- Cabbage + Dill
- Bell Pepper + Basil
- Pea + Carrot

Corn, pole beans and squash together are the traditional "three sisters" planting. In this data, corn is listed as a good neighbour for both beans and squash.

Crops with the most "keep apart" entries (from the 34 matrix crops)

Pole Bean (10), Tomato (7), Potato (6), Bush Bean (5), Cabbage (5), Dill (4).

A crop with many "keep apart" entries is not a bad crop. It just needs a bed of its own, or neighbours from the green side of its row.

Most friendly crops (most good neighbours among the 34 matrix crops)

Bush Bean (13), Carrot (13), Onion (13), Cabbage (10), Radish (9), Sweet Corn (9).

How to read and use the chart

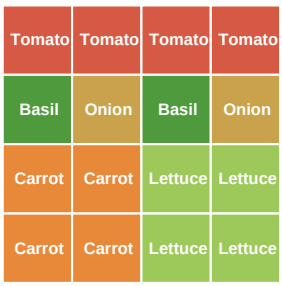

- Look up the crop you want to plant in the left column of the matrix (page 1) or on the A-Z table (pages 3-5).
- Plan each bed around one main crop, then choose neighbours from its good list that also suit your sun, water and season.
- Where a pairing is both "good" and "keep apart" in different sources, the chart shows keep apart, so you err on the safe side.
- Use the blank beds on the last page to draw your plan before you plant. One square is one square foot.
- Add your own notes. If a pair works well or badly in your garden, that experience beats any chart.

How much to trust it

Companion planting evidence is mixed. A few effects have research behind them, such as tall crops giving shade to lettuce or strong-scented herbs confusing some pests. Many specific pairings are traditional advice that has not been tested in controlled trials. The best-supported rules are to rotate plant families and to avoid crowding heavy feeders together. Treat the pairings as sensible defaults, not hard rules.

Three starter beds (4 x 4 ft, one square = 1 sq ft, back of the bed at the top)

Tomato bed

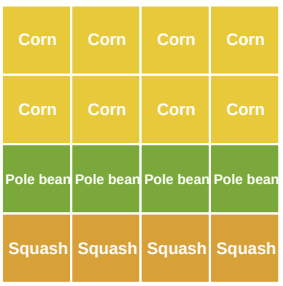

Tall tomatoes at the back so they do not shade the lower crops.

Salad bed

Quick radishes finish first and free their squares for a second sowing.

Corn, bean and squash bed

Beans climb the corn; squash sprawls at the front. Plant corn in a block, not a single row.

A-Z companion table

Good neighbours and crops to keep apart, for all 92 crops on the site

Crop	Good neighbours	Keep apart
Amaranth (Leaf)	Sweet Corn	-
Arugula	Beet, Bush Bean, Cucumber, Lettuce, Onion	-
Asparagus	Basil, Parsley, Tomato	Garlic, Onion, Potato
Basil	Asparagus, Bell Pepper, Chili Pepper, Ground Cherry, Okra, Tomatillo, Tomato	Mint, Sage
Beet	Arugula, Bok Choy / Pak Choi, Broccoli, Brussels Sprouts, Bush Bean, Cabbage, Cauliflower, Collard Greens, Garlic, Green Onion / Scallion, Kale, Kohlrabi, Lettuce, Napa Cabbage, Onion, Rapini (Broccoli Raab), Shallot	Lima Bean, Pole Bean, Spinach, Swiss Chard
Bell Pepper	Basil, Carrot, Chives, Eggplant, Ground Cherry, Okra, Onion, Oregano, Parsley, Spinach, Sweet Marjoram, Tomatillo	Bush Bean, Cabbage, Kohlrabi, Pole Bean
Bitter Melon	Bush Bean, Sweet Corn	-
Bok Choy / Pak Choi	Beet, Cucumber, Onion	Pole Bean, Tomato
Borage	Swiss Chard, Tomato, Zucchini / Summer Squash	-
Broccoli	Beet, Celery, Dill, Lemon Balm, Onion, Potato, Rhubarb	Lettuce, Pole Bean, Tomato
Brussels Sprouts	Beet, Carrot, Dill, Onion, Potato	Pole Bean, Tomato

Sweet Corn	Amaranth (Leaf), Bitter Melon, Bush Bean, Cantaloupe / Muskmelon, Chayote, Cucamelon, Cucumber, Edamame (Soybean), Lima Bean, Pea, Peanut, Pole Bean, Potato, Pumpkin, Southern Pea (Cowpea), Sunflower, Watermelon, Winter Squash, Zucchini / Summer Squash	Tomato
Sweet Marjoram	Bell Pepper, Eggplant	-
Sweet Potato	Bush Bean, Okra	Pumpkin, Winter Squash
Swiss Chard	Borage, Bush Bean, Cabbage, Kale, Onion	Beet, Spinach
Tarragon	Eggplant, Tomato	-
Tatsoi	-	Pole Bean, Tomato
Thyme	Cabbage, Eggplant	-
Tomatillo	Basil, Bell Pepper	-
Tomato	Asparagus, Basil, Borage, Carrot, Celery, Chives, Garlic, Green Onion / Scallion, Lettuce, Mint, Onion, Parsley, Tarragon	Bok Choy / Pak Choi, Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Collard Greens, Dill, Fennel (Bulb), Kale, Kohlrabi, Mizuna, Napa Cabbage, Potato, Rapini (Broccoli Raab), Sweet Corn, Tatsoi
Turmeric	-	-
Turnip	Bush Bean, Onion, Pea	Potato, Rutabaga
Watercress	-	-
Watermelon	Bush Bean, Radish, Sweet Corn	Potato
Winter Squash	Bush Bean, Pole Bean, Radish, Sweet Corn	Potato, Sweet Potato
Zucchini / Summer Squash	Borage, Bush Bean, Pea, Pole Bean, Radish, Sweet Corn	Potato

A dash means no strong pairing is recorded for that crop. Fruit and herb entries follow the same rules as vegetables.

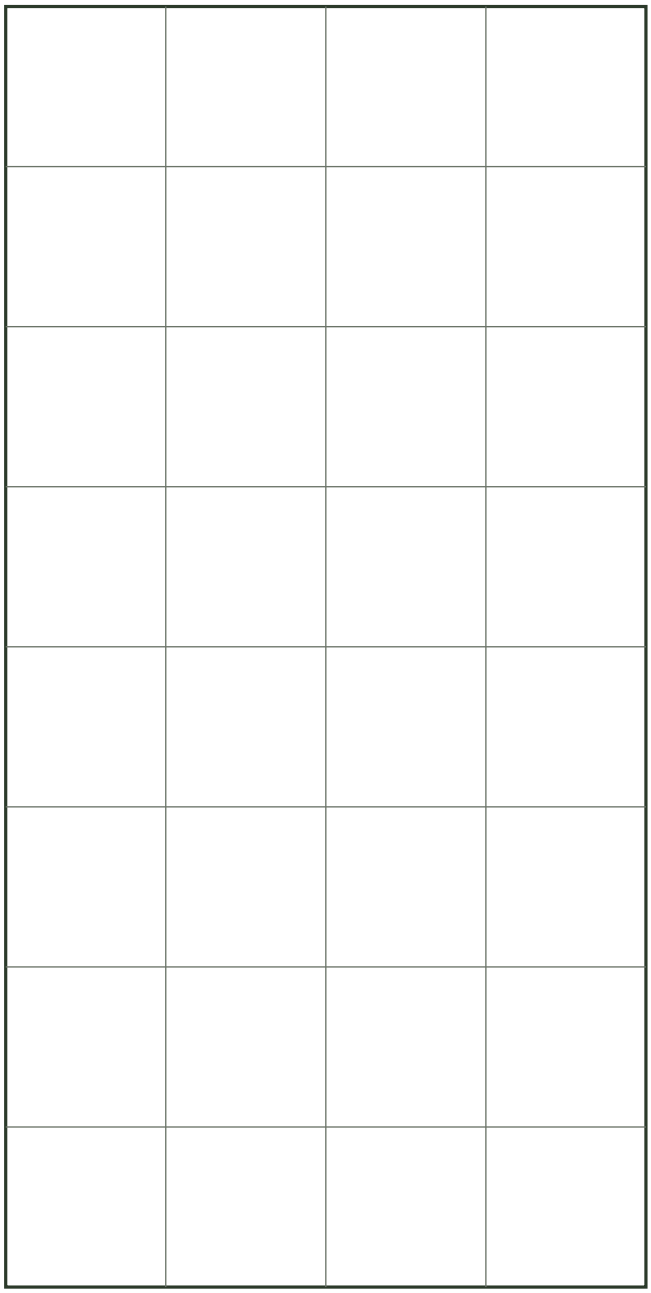

Plan your beds

Rotation families, notes and two blank 4 x 8 ft beds

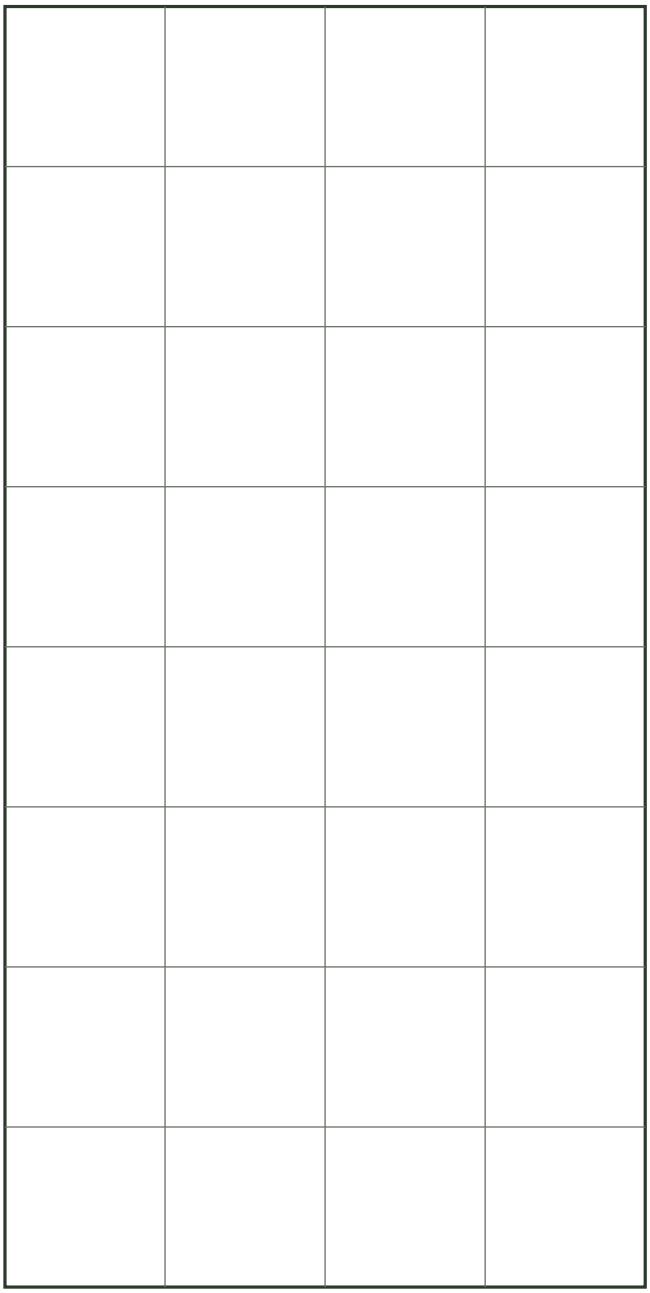

Rotate by plant family: avoid planting the same family in the same bed year after year.

Brassicaceae: Arugula, Bok Choy / Pak Choi, Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Collard Greens, ...
Lamiaceae: Basil, Lemon Balm, Mint, Oregano, Rosemary, Sage, Shiso (Perilla), ...
Apiaceae: Carrot, Celeriac, Celery, Chervil, Cilantro / Coriander, Dill, Fennel (Bulb), ...
Fabaceae: Bush Bean, Edamame (Soybean), Fava Bean (Broad Bean), Lima Bean, Pea, Peanut, Pole Bean, ...
Cucurbitaceae: Bitter Melon, Chayote, Cucumber, Luffa (Loofah Gourd), Pumpkin, Winter Squash, Zucchini / Summer Squash
Asteraceae: Endive & Escarole, Globe Artichoke, Lettuce, Radicchio, Salsify, Sunflower, Tarragon
Solanaceae: Bell Pepper, Chili Pepper, Eggplant, Potato, Tomatillo, Tomato
Amaryllidaceae: Chives, Garlic, Green Onion / Scallion, Leek, Onion, Shallot

Bed 1 (1 square = 1 sq ft)

Bed 2 (1 square = 1 sq ft)
